MADA

Waterjet Cutting Service

Since abrasive waterjet cutting utilizes a high velocity, coherent stream of water and abrasive, it can be used to custom cut most materials including:

- Stainless Steel
- Carbon Steel
- Phenolic
- Tile
- Acrylic
- Titanium
- Foams
- Copper
- Aluminum
- Brass
- Ceramics
- Hastelloy
- Armor Plate
- Wood
- Marble
- Silicone
- Kevlar
- Plastics
- Granite
- Rubber
- UHMW
- Glass
- Laminates

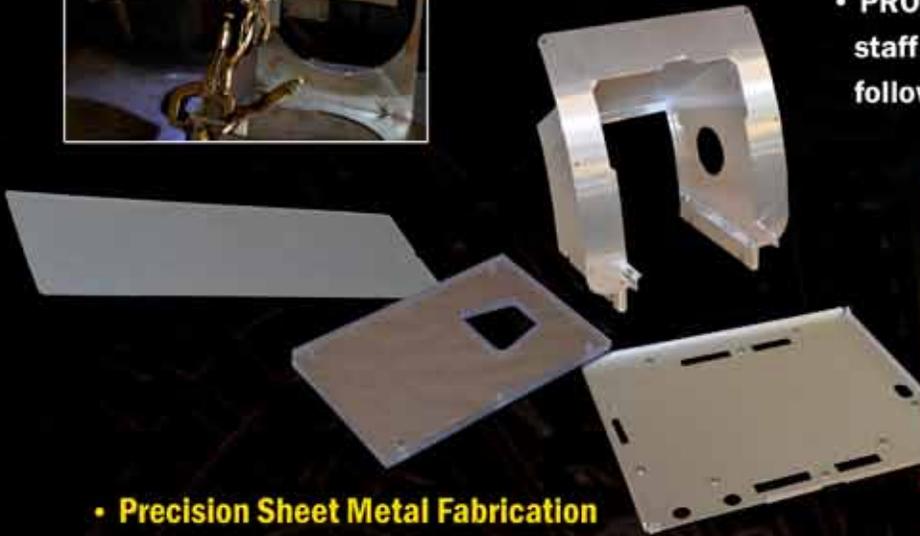

Precision Sheet Metal Fabrication

HP Precision, Inc. is a full service job shop dedicated to providing our customers with quality workmanship and personalized service.

Specifically We Offer...

- **QUICK REACTION TIME** resulting from our size and flexibility
- **A MODERN FACILITY** equipped to meet today's demanding requirements for product quality and specialized manufacturing processes
- **PROVEN EXPERIENCE** of our carefully chosen staff to ensure prompt and accurate follow-through on every project; large or small

- **Precision Sheet Metal Fabrication**
- **Precision Machining**
- **MIL-SPEC Welding (Aluminum, Stainless Steel, Mild Steel, etc...)**
- **Mobile MIL-SPEC Welding**
- **Plasma Cutting**
- **Custom Metal Rework (Mobile and in-house)**
- **Metal Finishing (#4 Stainless Steel, Grinding, Polishing, Plating, Painting)**
- **Turnkey Assembly (Mechanical and Electrical)**
- **Engineering Support (Design, Cost Reduction, Manufacture Ability, Prototype)**

Our competitive advantage is not in having the latest technological equipment. Anybody can buy the same machines. It is how we use our equipment to get the absolute most out of it that differentiates us. Give us a try! With a diverse knowledge of all aspects of metal manufacturing, HP Precision can be your ONE STOP METAL SHOP.

Our custom waterjet cutting services are a cut above the rest. We use high quality CNC machinery and programming software to create flawless designs out of raw material. By using cutting edge waterjet technology, we give our customers quality custom machined parts and products along with competitive pricing.

Excellent Work Table Accessibility on a Machine Built for the Rigors of Waterjet Cutting

With robust mechanical design, integrated machine systems, intuitive user control, multiple table sizes, and several configurations available, the Mach 2b Series sets you up for success.
